NAVIGA MODERATE INCOME PORTFOLIO

MODEL PORTFOLIO INFORMATION DOCUMENT

DATE 2026/10/31

INVESTMENT OBJECTIVE

This portfolio is suitable for investors with a moderate income need. The investment objective is to provide both income and capital growth, with moderate levels of volatility. The portfolio is divided into term components, allocating to income-generating funds in the short-term component for income provisions, while allocating to growth funds in the long-term component for capital appreciation. The portfolio will be rebalanced when markets are favourable.

PORTFOLIO INFORMATION

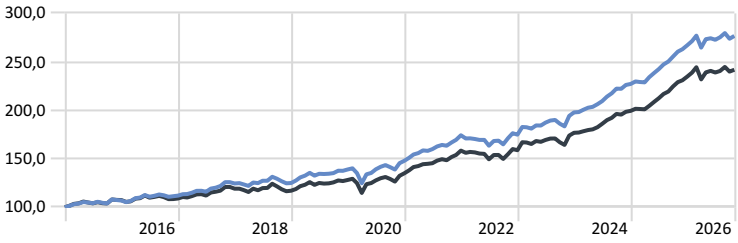

Portfolio manager:	Investment Committee
Launch date:	1 January 2015
ASISA Category:	SA Multi-Asset Medium Equity
Regulation 28:	This portfolio is managed in accordance with Regulation 28
Effective Annual Cost (EAC):	Refer to Linked Investment Service Provider

The Total Expense Ratio (TER) of the underlying funds, administration and portfolio management fee may differ from platform to platform and can be obtained from the particular LISP's quote. A Schedule of fees, charges and maximum commissions are available on request.

RISK PROFILE

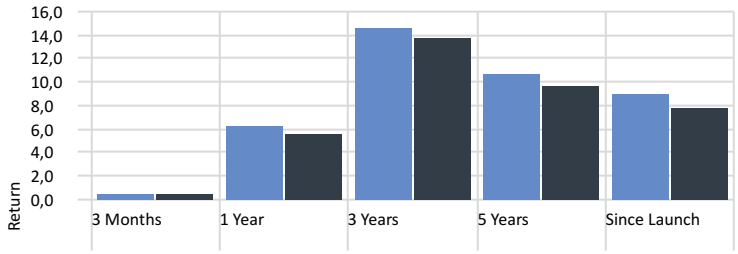

MEDIUM

- Medium risk portfolios generally have moderate levels of equity exposure, resulting in less volatility compared to portfolios with higher equity exposure, but higher volatility compared to portfolios with lower equity exposure.
- Moderate exposure to equity and other growth assets increases the probability of capital loss (permanent or temporary) compared to low-risk portfolios, but lowers the probability of capital loss compared to high-risk portfolios.
- The potential long-term investment returns from medium risk portfolios are expected to be lower than higher risk portfolios, but higher than lower risk portfolios.

DISCLAIMER

Managed by: Naviga Solutions. Authorised Financial Service Provider, FSP Number 381.

The fund allocation (above) indicates the model portfolio fund holdings, which are quantitatively and qualitatively assessed on a quarterly basis by the independent investment committee. Where any of the above funds are not available on any particular Linked Investment Service Provider (LISP) platform, an appropriately comparable replacement fund is selected by the investment committee. Due to the possible fund composition variations resulting from such comparable replacements, the actual overall asset allocation, fees and returns may differ across platforms. Periodic portfolio rebalancing is initiated by the investment committee to realign strategic allocations whilst taking specific account of the intended risk and return profiles of the portfolios as well as capital gains tax and cost effects. Past performance is not indicative of future performance. The capital or the return of a portfolio is not guaranteed. A wrap fund is a portfolio consisting of a number of underlying investments wrapped into a single product. Wrap funds are not legal CIS funds of funds as the wrap fund itself is not a collective investment portfolio, but is simply a collection of separate collective investment portfolios and money market accounts. With a wrap fund the investor has direct ownership of the underlying investments. Wrap funds are not regulated by the Collective Investment Schemes Control Act and do not have a separate legal status. They are regulated by the same legislation that applies to Linked Investment Services Providers (LISPs), namely the Stock Exchanges Control Act and the Financial Markets Control Act. Investors should take note that any changes made within a wrap fund can trigger capital gains tax.

This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing in the model portfolios.

The portfolio's performance numbers are based on a master portfolio tracked in the Morningstar Direct system. These performance numbers are net of all underlying managers TER's, but gross of the model portfolio management, LISP and advice fees. The Effective Annual Cost (EAC) can be obtained from the specific Linked Investment Service Provider (LISP).
